

Casa Velluto Digital Menu

Customer screen, back office and DevAny dashboard

A QR digital menu for a Roman trattoria and aperitivo bar in English and Arabic, with diet filters, pairings, an aperitivo-hour banner and call-a-server, plus a bilingual menu editor, table QR tents and menu stats for the team.

demo-casavelluto-menu.devany.app

What was built?

Roman trattoria & aperitivo bar · Jumeirah, Dubai. One DevAny app with two faces: the screen on the customer's phone and the business's back office.

Highlights

- 60 dishes and drinks in English and Arabic (full right-to-left), with sticky categories, search and Chef's pick / New / Sold-out badges
- Diet filters (vegetarian, vegan, gluten-free option, hide nuts, not spicy, no alcohol), allergens and a wine + alcohol-free pairing for every dish
- Menu editor with English and Arabic side by side: prices, reorder, categories and one-tap sold-out that guests see instantly
- Table QR codes generated in the browser, printable A5 table tents for 24 tables and 8 terrace tables, and 14-day menu stats

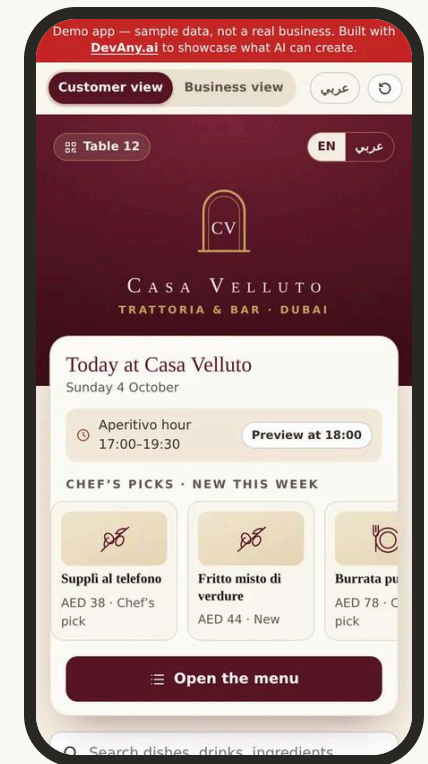

The demo and your copy

- The demo runs entirely in the browser: sample data is generated on the page, nothing is saved, and no AI or email is called.
- Your copy is a real DevAny app: records are stored and the back office opens with a staff sign-in.
- Customers use it from a link or QR code, with no account.

What the customer sees

Customers open the app from a link or QR code; no install or account needed.

- English ↔ Arabic with full right-to-left layout
- Sticky category tabs with scroll-spy and search
- Diet filters: vegetarian, vegan, gluten-free option, hide nuts, not spicy, no alcohol
- Dish sheet with allergens and a wine + alcohol-free pairing
- Aperitivo-hour banner 17:00–19:30, with “Preview at 18:00”
- Call a server / ask for the bill / help with allergies, with live status

What the business manages

The business view inside the app is where the owner and team work day to day.

- Overview: 14-day menu views (EN/AR), most-viewed dishes and top filters
- Live table requests: On my way → Done, reflected to the guest
- Menu editor: EN/AR side by side, add/edit/delete, reorder items and categories
- Inline price edit and one-tap sold-out, live in the guest menu
- QR codes for tables 1–24 and terrace T1–T8, with printable A5 table tents
- Settings: aperitivo hours and the pork-free kitchen note

TRY IT IN THE LIVE DEMO

See both screens work together

In the demo, the switch in the top bar moves between the customer and business views.

Try this

1. In Customer view, tap Call a server, then Call a server again
2. Switch to Business view: your Table 12 request is at the top, tagged YOU; press On my way
3. Switch back to Customer view: your card now says "On the way to your table"

Demo address

`demo-casavelluto-menu.devany.app`

What you try in the demo is not saved; it resets when the page reloads.

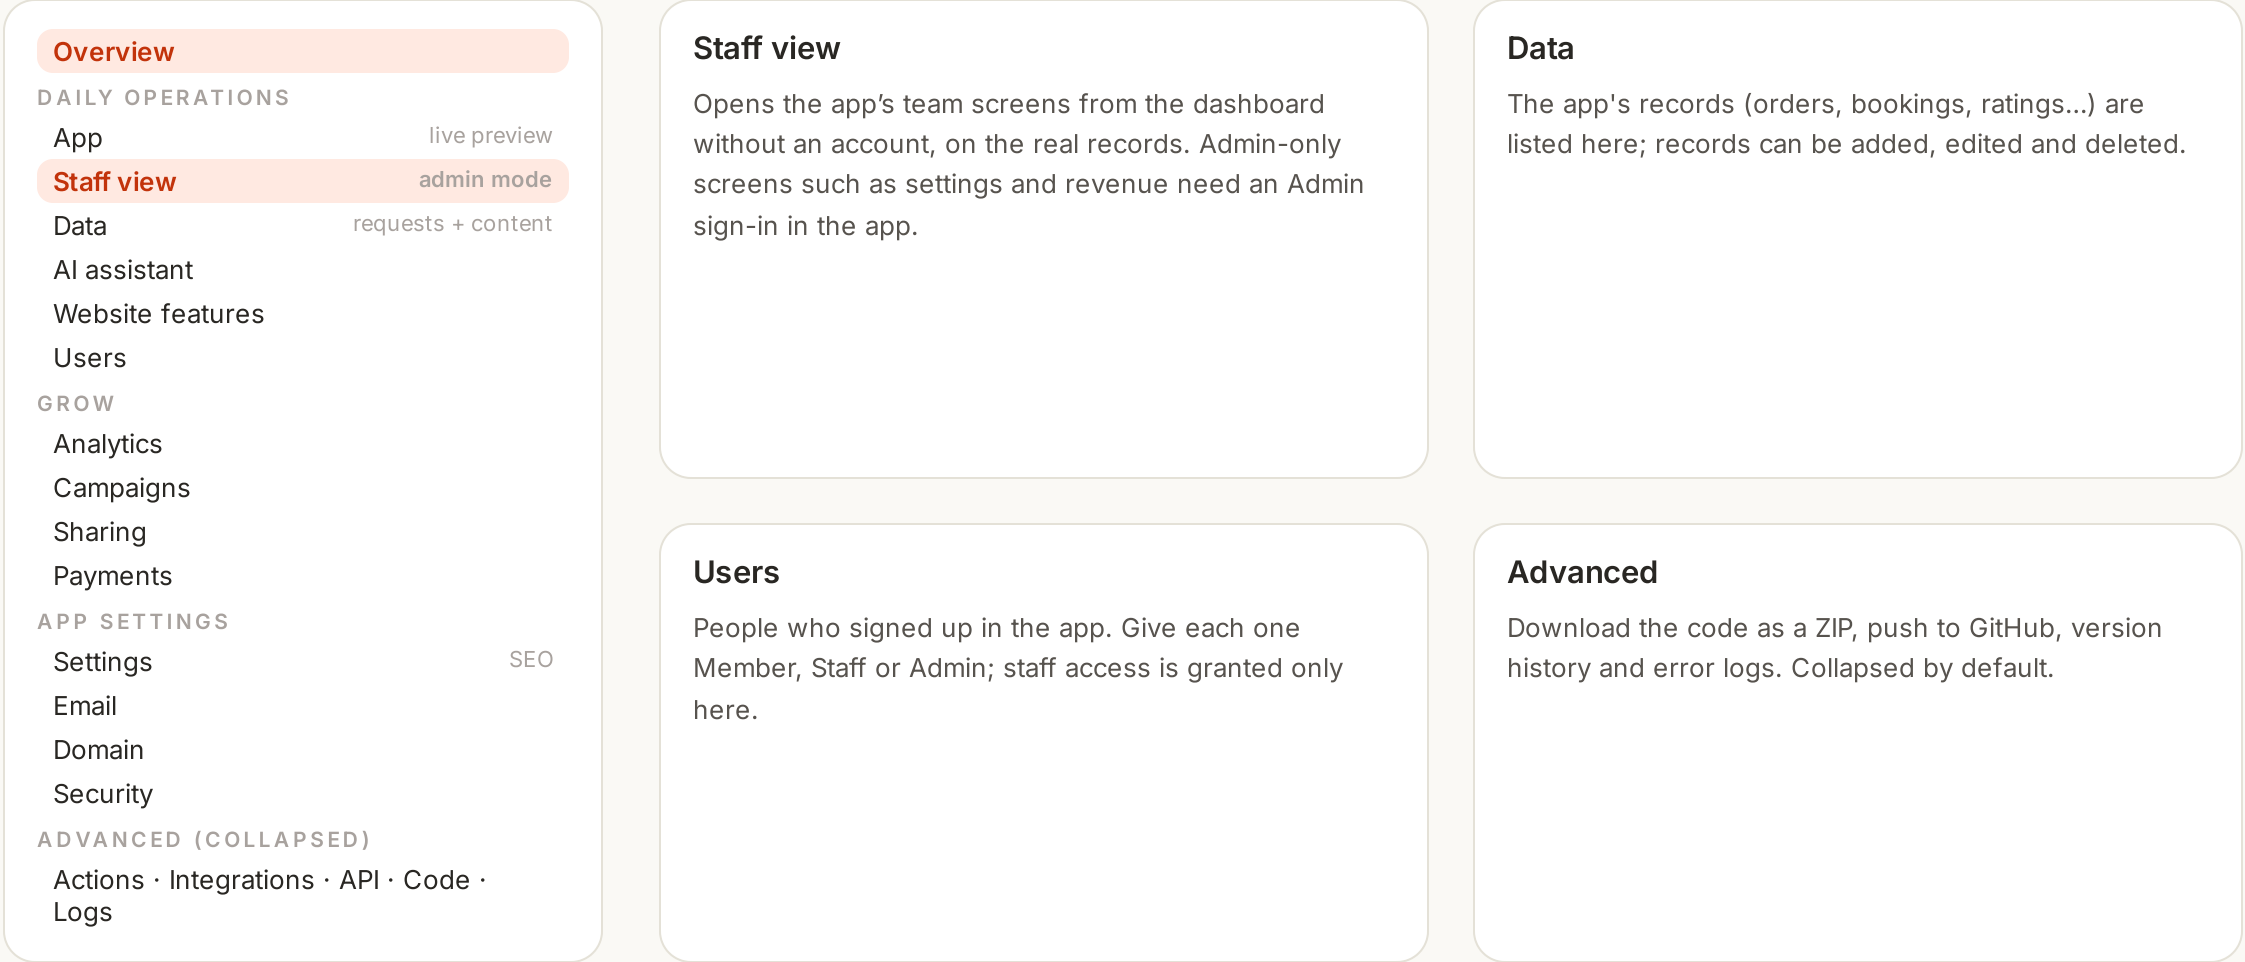

The brand's website

Casa Velluto — Italian restaurant — Roman trattoria & aperitivo bar

`casa-velluto.devany.app`

Map of the DevAny dashboard

The owner runs the project from the “Manage” screen on devany.ai. The menu runs from daily work to technical settings.

Back-office access, data and alerts

The demo's Customer/Business switch exists only in the showcase. In your copy the back office is private and opens with a staff sign-in.

How to get in

1. Publish the app (the copy arrives as a draft)
2. Open the app, tap the staff/team sign-in link at the bottom and create an account
3. DevAny → Manage → **Users**: give yourself **Admin** and employees **Staff**
4. Sign in again in the app; the back office opens

There is no PIN and no automatic owner access.

Data and alerts

Customer records are stored in DevAny and shown in the back office and under Data. Lists closed to visitors: —

This app has no private list collecting visitor submissions, so it sends no submission alerts.

Email and AI

Emails to customers (confirmations, reminders) go out when the app's email is on and the app is live; each uses a small amount of AI credit.

EN↔AR translation and a 14-day stats summary. Runs for real when clicked and uses AI credit; in the demo the results are pre-made.

AFTER YOU COPY

Go-live checklist

The steps shown in the dashboard after copying. Price, text and image edits go live instantly and spend no credit.

1. Create your team account: open the menu, tap Staff sign-in, sign up, then give yourself the Admin role in the DevAny dashboard under Users (Staff for your team).
2. Replace the starting menu with your own dishes, prices and Arabic texts in Menu editor (AI can translate a dish for you).
3. Set your currency, aperitivo hours, table count and the note above the menu in Settings; turn the pork-free note off if it does not apply.
4. Publish, paste your menu address in Settings, then print the table QR tents.
5. Clear the sample data in Overview once real guests start using the menu.

This app takes no online payments (customers pay at the venue and staff mark "Paid"), sends no real SMS (WhatsApp only opens a link) and does not sync with POS, hotel/clinic software, calendars or review sites.

Copy this app to your account

“Copy to my account” on the showcase page brings the project into your account as a draft, with your business name, city and contact details.

How it works

1. Open devany.ai/showcase/apps/casavelluto-menu
2. Enter your business name, city, phone, WhatsApp and email
3. The project is created as a draft; clear the sample records in one tap from the dashboard
4. Edit texts, prices and images for your business, then publish

Copying uses no AI and spends no credit.

Plan to publish

PLAN	LIVE PROJECTS	DOMAIN
Free	No publishing, preview	—
Builder · \$29/mo	1	Included
Pro · \$79/mo	3	Included
Studio · \$199/mo	10	Included + white label

Copying is available on paid plans. Every paid plan includes monthly AI credit equal to its price.

Casa Velluto is a fictional business: phone and address are demo placeholders, images are illustrative, and submissions do not reach a real business.
