DEVANY SHOWCASE · USER GUIDE

Ardena Dental & Skin ClinicOS

Customer screen, back office and DevAny dashboard

Appointments, patient records and billing for small clinics: patients book, check in and pay from their phone, and the clinic runs the day from one live calendar.

demo-clinicos.devany.app

AT A GLANCE

What was built?

Dental & skin clinic · Moda, Istanbul. One DevAny app with two faces: the screen on the customer's phone and the business's back office.

Highlights

- Mobile booking with live per-clinician availability that respects treatment length, lunch breaks and capacity
- Bookings land instantly in the clinic calendar; confirm, check in, prescribe and complete, and the patient's phone updates
- Completing a visit issues an invoice: the patient pays (demo) and downloads a PDF receipt generated on the device
- Symptom pre-triage note and plain-language prescription explanations (AI demo), plus check-in QR codes and .ics export

The demo and your copy

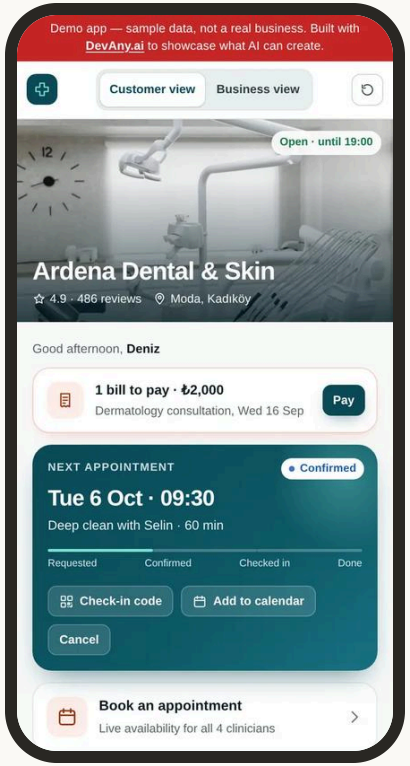

- The demo runs entirely in the browser: sample data is generated on the page, nothing is saved, and no AI or email is called.
- Your copy is a real DevAny app: records are stored and the back office opens with a staff sign-in.
- Customers use it from a link or QR code, with no account.

CUSTOMER VIEW

What the customer sees

Customers open the app from a link or QR code; no install or account needed.

- Book in 4 steps: treatment, clinician, date & time, review
- 14 treatments; lunch break and Sundays closed, full slots struck through
- Pay bills (demo checkout) and download a PDF receipt made on the device
- Prescriptions and visit summaries explained in plain language (AI demo)
- Symptom check writes a pre-visit note that prefills booking (AI demo)

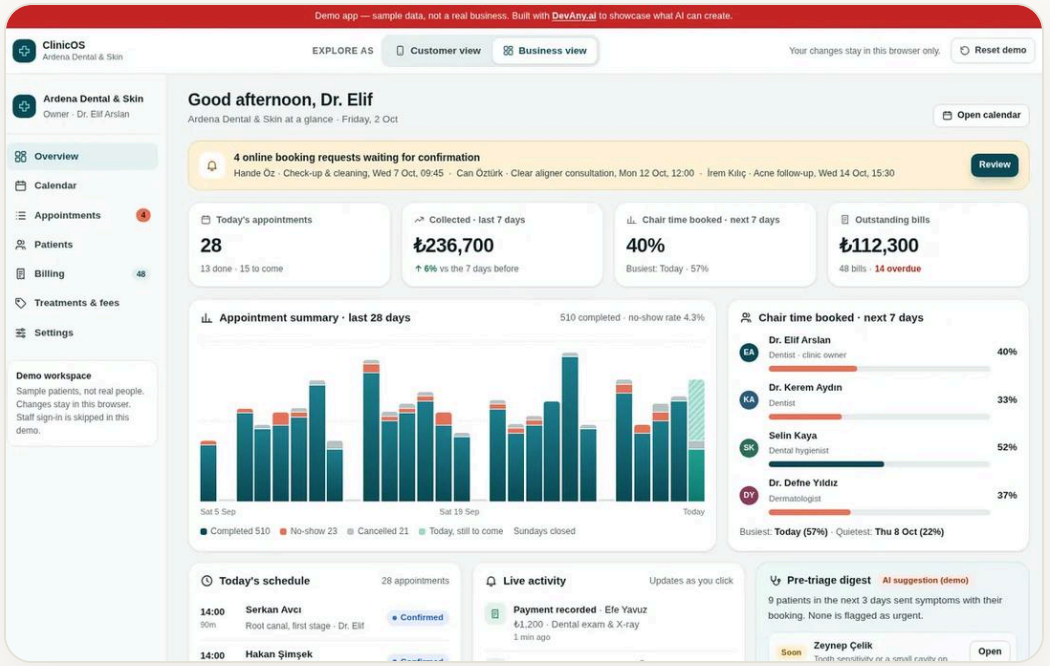

BACK OFFICE

What the business manages

The business view inside the app is where the owner and team work day to day.

- Calendar 09:00–19:00 with a column per clinician and Export day (.ics)
- Appointment drawer: Confirm, Check in, Complete, Prescribe, invoice
- KPIs, 28-day appointment summary and AI pre-triage digest (demo)
- 56 patients with allergy alerts, prescriptions and clinic notes
- Billing: unpaid and overdue invoices, Record payment and PDF

TRY IT IN THE LIVE DEMO

See both screens work together

In the demo, the switch in the top bar moves between the customer and business views.

Try this

1. In Customer view, book a Check-up & cleaning
2. Switch to Business view: Confirm it under Needs action, then Check in and Complete
3. Switch back: a new bill appears; pay it (demo) and download the PDF receipt

Demo address

`demo-clinicos.devany.app`

What you try in the demo is not saved; it resets when the page reloads.

OWNER DASHBOARD

Map of the DevAny dashboard

The owner runs the project from the “Manage” screen on devany.ai. The menu runs from daily work to technical settings.

- Overview

DAILY OPERATIONS

- App — live preview
- Staff view — admin mode
- Data — requests + content
- AI assistant
- Website features
- Users

GROW

- Analytics
- Campaigns
- Sharing
- Payments

APP SETTINGS

- Settings — SEO
- Email
- Domain
- Security

ADVANCED (COLLAPSED)

Actions · Integrations · API · Code · Logs

Staff view

Opens the app’s team screens from the dashboard without an account, on the real records. Admin-only screens such as settings and revenue need an Admin sign-in in the app.

Data

The app's records (orders, bookings, ratings…) are listed here; records can be added, edited and deleted.

Users

People who signed up in the app. Give each one Member, Staff or Admin; staff access is granted only here.

Advanced

Download the code as a ZIP, push to GitHub, version history and error logs. Collapsed by default.

IN YOUR OWN COPY

Back-office access, data and alerts

The demo’s Customer/Business switch exists only in the showcase. In your copy the back office is private and opens with a staff sign-in.

How to get in

1. Publish the app (the copy arrives as a draft)
2. Open the app, tap the staff/team sign-in link at the bottom and create an account
3. DevAny → Manage → **Users**: give yourself **Admin** and employees **Staff**
4. Sign in again in the app; the back office opens

There is no PIN and no automatic owner access.

Data and alerts

Customer records are stored in DevAny and shown in the back office and under Data. Lists closed to visitors: `appointments` `patients`

Every new record in these lists creates a dashboard alert and, while the app is live, a free email to you.

Email and AI

Emails to customers (confirmations, reminders) go out when the app’s email is on and the app is live; each uses a small amount of AI credit.

Pre-visit note from symptoms (patient-facing) and a clinic helper; not a diagnosis, staff review it. Runs for real when clicked and uses AI credit; in the demo the results are pre-made.

AFTER YOU COPY

Go-live checklist

The steps shown in the dashboard after copying. Price, text and image edits go live instantly and spend no credit.

1. Open the published app, use “Clinic team sign-in” at the bottom to create your account, then give yourself the Admin role in the DevAny dashboard under Users. Give reception and clinicians the Staff role.
2. Replace the four sample clinicians with your team: names and days off in Settings › Team; titles and treatment areas in the dashboard under Data › clinicians.
3. Set your currency, opening hours and booking rules in Settings, and review every fee and duration in Treatments & fees.
4. Replace the photo with your own treatment room.
5. Turn on email for this app in the DevAny dashboard so patients get confirmations and reminders.
6. Explore the sample patients and appointments, then press Clear sample data before you open for real.

This app takes no online payments (customers pay at the venue and staff mark “Paid”), sends no real SMS (WhatsApp only opens a link) and does not sync with POS, hotel/clinic software, calendars or review sites.

FOR YOUR OWN BUSINESS

Copy this app to your account

“Copy to my account” on the showcase page brings the project into your account as a draft, with your business name, city and contact details.

How it works

1. Open `devany.ai/showcase/apps/clinicos`
2. Enter your business name, city, phone, WhatsApp and email
3. The project is created as a draft; clear the sample records in one tap from the dashboard
4. Edit texts, prices and images for your business, then publish

Copying uses no AI and spends no credit.

Plan to publish

PLAN	LIVE PROJECTS	DOMAIN
Free	No publishing, preview	—
Builder · $29/mo	1	Included
Pro · $79/mo	3	Included
Studio · $199/mo	10	Included + white label

Copying is available on paid plans. Every paid plan includes monthly AI credit equal to its price.

Ardena Dental & Skin is a fictional business: phone and address are demo placeholders, images are illustrative, and submissions do not reach a real business.
