DEVANY SHOWCASE · USER GUIDE

Saffron & Shear SalonSuite

Customer screen, back office and DevAny dashboard

Online booking and client tracking for salons: clients book a free slot in seconds, and the owner runs the day from a live stylist calendar.

demo-salonsuite.devany.app

AT A GLANCE

What was built?

Hair & beauty salon · Jumeirah 1, Dubai. One DevAny app with two faces: the screen on the customer's phone and the business's back office.

Highlights

- Mobile booking with live per-stylist availability that respects service length and capacity
- Bookings land instantly in the owner's day calendar; confirming updates the client's phone
- Client history with before/after photo comparison, colour formulas and notes
- Check-in QR codes, .ics calendar export and an AI style suggestion from a photo (demo)

The demo and your copy

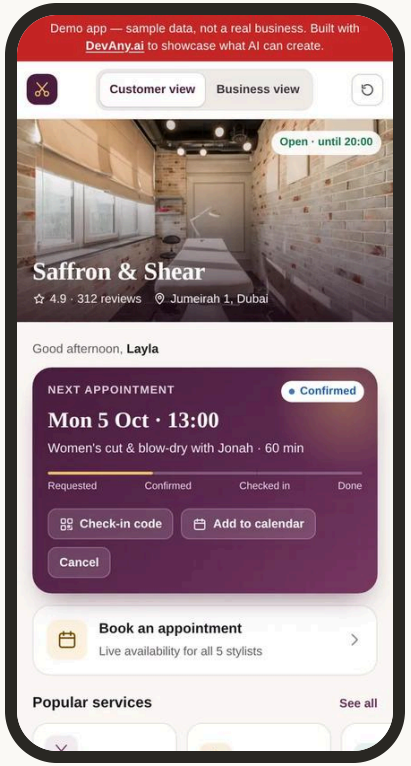

- The demo runs entirely in the browser: sample data is generated on the page, nothing is saved, and no AI or email is called.
- Your copy is a real DevAny app: records are stored and the back office opens with a staff sign-in.
- Customers use it from a link or QR code, with no account.

CUSTOMER VIEW

What the customer sees

Customers open the app from a link or QR code; no install or account needed.

- Book in 4 steps: service, stylist, date & time, review
- 12 services; slots grouped by time of day, full ones struck through
- Appointment tracker: Requested → Confirmed → Checked in → Done
- Check-in QR, .ics download and before/after comparison on past visits
- Style AI: sample photo scan and 3 style suggestions (demo)

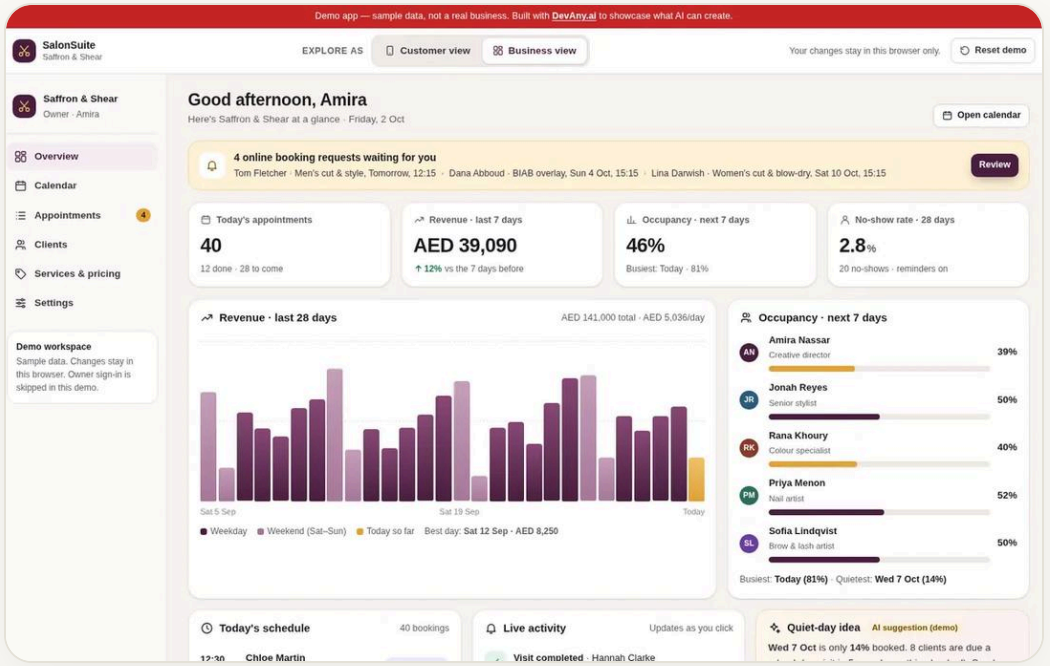

BACK OFFICE

What the business manages

The business view inside the app is where the owner and team work day to day.

- Day calendar per stylist, 10:00–20:00, with now-line and Export day (.ics)
- Appointments tabs: Needs action, Today, Upcoming, Past; one-click Confirm
- KPIs, 28-day revenue chart and 7-day occupancy per stylist
- About 48 clients with colour formulas, notes and before/after photos
- Edit service prices and durations; booking updates at once

TRY IT IN THE LIVE DEMO

See both screens work together

In the demo, the switch in the top bar moves between the customer and business views.

Try this

1. In Customer view, book a cut with Any stylist at the first free slot
2. Tap See it in Business view and Confirm it under Appointments → Needs action
3. Switch back to Customer view: the visit now shows Confirmed

Demo address

`demo-salonsuite.devany.app`

What you try in the demo is not saved; it resets when the page reloads.

OWNER DASHBOARD

Map of the DevAny dashboard

The owner runs the project from the “Manage” screen on devany.ai. The menu runs from daily work to technical settings.

- Overview

DAILY OPERATIONS

- App — live preview
- Staff view — admin mode
- Data — requests + content
- AI assistant
- Website features
- Users

GROW

- Analytics

- Sharing
- Payments

APP SETTINGS

- Settings — SEO
- Email
- Domain
- Security

ADVANCED (COLLAPSED)

Actions · Integrations · API · Code · Logs

Staff view

Opens the app’s team screens from the dashboard without an account, on the real records. Admin-only screens such as settings and revenue need an Admin sign-in in the app.

Data

The app's records (orders, bookings, ratings…) are listed here; records can be added, edited and deleted.

Users

People who signed up in the app. Give each one Member, Staff or Admin; staff access is granted only here.

Advanced

Download the code as a ZIP, push to GitHub, version history and error logs. Collapsed by default.

IN YOUR OWN COPY

Back-office access, data and alerts

The demo’s Customer/Business switch exists only in the showcase. In your copy the back office is private and opens with a staff sign-in.

How to get in

1. Publish the app (the copy arrives as a draft)
2. Open the app, tap the staff/team sign-in link at the bottom and create an account
3. DevAny → Manage → **Users**: give yourself **Admin** and employees **Staff**
4. Sign in again in the app; the back office opens

There is no PIN and no automatic owner access.

Data and alerts

Customer records are stored in DevAny and shown in the back office and under Data. Lists closed to visitors: `appointments` `clients` `booking_changes`

Every new record in these lists creates a dashboard alert and, while the app is live, a free email to you.

Email and AI

Emails to customers (confirmations, reminders) go out when the app’s email is on and the app is live; each uses a small amount of AI credit.

Style match from a client photo (customer-facing) and an owner offer. Runs for real when clicked and uses AI credit; in the demo the results are pre-made.

AFTER YOU COPY

Go-live checklist

The steps shown in the dashboard after copying. Price, text and image edits go live instantly and spend no credit.

1. Open the app, tap “Staff sign-in” at the bottom, create your account, then give it the Admin role in the DevAny dashboard under Users
2. Set your currency and opening hours in Settings
3. Review your services, prices and durations under Services & pricing
4. Replace the sample team with your own stylists: names, services and days off (Settings › Team)
5. Turn on email for the app so clients get confirmations and reminders
6. Replace the salon photo with a photo of your own salon
7. Invite your stylists: they sign up with Staff sign-in and you give them the Staff role
8. Clear the sample bookings before you open for real

This app takes no online payments (customers pay at the venue and staff mark “Paid”), sends no real SMS (WhatsApp only opens a link) and does not sync with POS, hotel/clinic software, calendars or review sites.

FOR YOUR OWN BUSINESS

Copy this app to your account

“Copy to my account” on the showcase page brings the project into your account as a draft, with your business name, city and contact details.

How it works

1. Open `devany.ai/showcase/apps/salonsuite`
2. Enter your business name, city, phone, WhatsApp and email
3. The project is created as a draft; clear the sample records in one tap from the dashboard
4. Edit texts, prices and images for your business, then publish

Copying uses no AI and spends no credit.

Plan to publish

PLAN	LIVE PROJECTS	DOMAIN
Free	No publishing, preview	—
Builder · $29/mo	1	Included
Pro · $79/mo	3	Included
Studio · $199/mo	10	Included + white label

Copying is available on paid plans. Every paid plan includes monthly AI credit equal to its price.

Saffron & Shear is a fictional business: phone and address are demo placeholders, images are illustrative, and submissions do not reach a real business.
