DEVANY SHOWCASE · USER GUIDE

Qahwa & Co. Smart Menu

Customer screen, back office and DevAny dashboard

A QR menu that switches breakfast, lunch, happy hour and dinner by the clock, and lets guests hide any of the 14 EU allergens in one tap.

demo-smartmenu.devany.app

AT A GLANCE

What was built?

Café · smart menu · Downtown Dubai, UAE. One DevAny app with two faces: the screen on the customer's phone and the business's back office.

Highlights

- Diet and allergen filters (14 EU allergens, vegan, vegetarian, gluten-free, halal) plus a “may contain” option
- Time-based menus and happy-hour prices that switch automatically, with a “Preview at time…” control
- Owner allergen matrix (dishes × allergens), schedule editor and specials manager, all live on every table
- 1-tap “How was your visit?” rating that lands in a feedback inbox, where the owner can reply

The demo and your copy

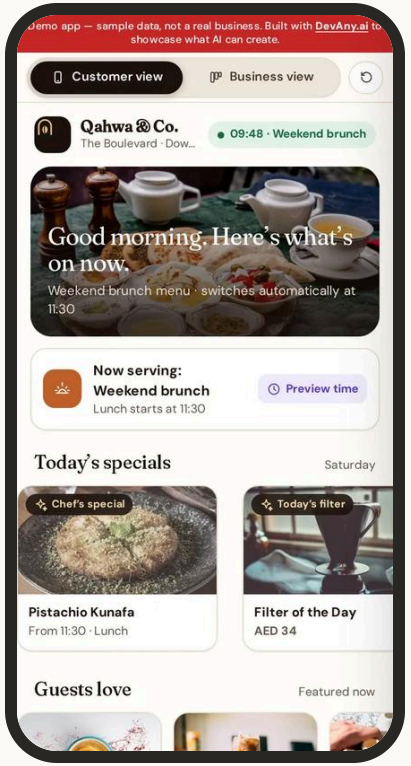

- The demo runs entirely in the browser: sample data is generated on the page, nothing is saved, and no AI or email is called.
- Your copy is a real DevAny app: records are stored and the back office opens with a staff sign-in.
- Customers use it from a link or QR code, with no account.

CUSTOMER VIEW

What the customer sees

Customers open the app from a link or QR code; no install or account needed.

- Breakfast, brunch, lunch, happy hour and dinner switch by the Dubai clock, prices included
- Preview at time…: presets, a weekday picker and a 15-minute slider
- Show only vegan, vegetarian, gluten-free or halal; hide any of the 14 allergens
- Today's specials strip with special prices and hidden-allergen warnings
- 1-tap rating at the end of the menu, then its status and the owner's reply

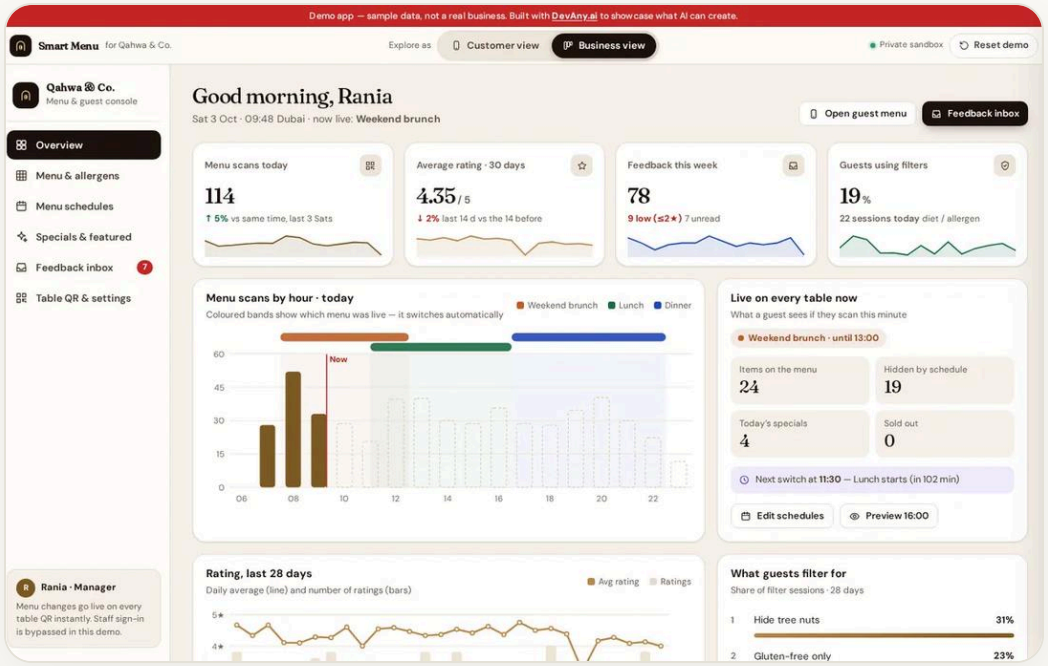

BACK OFFICE

What the business manages

The business view inside the app is where the owner and team work day to day.

- Overview: scans, 30-day rating, feedback, scans by hour with schedule bands
- Allergen matrix of 43 dishes × 14 allergens with conflict checks and Print
- Schedule editor: week grid, times, weekdays, categories and price adjustment
- Specials, featured dishes, item prices and availability
- Feedback inbox: reply, internal note, Resolve and an AI summary (demo)

TRY IT IN THE LIVE DEMO

See both screens work together

In the demo, the switch in the top bar moves between the customer and business views.

Try this

1. In Customer view, rate your visit 2★ with a comment at the end of the menu
2. Switch to Business view: it tops the Feedback inbox; reply and Resolve it
3. Switch back: your rating shows Resolved with the owner's reply

Demo address

`demo-smartmenu.devany.app`

What you try in the demo is not saved; it resets when the page reloads.

The brand’s website

OWNER DASHBOARD

Map of the DevAny dashboard

The owner runs the project from the “Manage” screen on devany.ai. The menu runs from daily work to technical settings.

- Overview

DAILY OPERATIONS

- App — live preview
- Staff view — admin mode
- Data — requests + content
- AI assistant
- Website features
- Users

GROW

- Analytics
- Campaigns
- Sharing
- Payments

APP SETTINGS

- Settings — SEO
- Email
- Domain
- Security

ADVANCED (COLLAPSED)

Actions · Integrations · API · Code · Logs

Staff view

Opens the app’s team screens from the dashboard without an account, on the real records. Admin-only screens such as settings and revenue need an Admin sign-in in the app.

Data

The app's records (orders, bookings, ratings…) are listed here; records can be added, edited and deleted.

Users

People who signed up in the app. Give each one Member, Staff or Admin; staff access is granted only here.

Advanced

Download the code as a ZIP, push to GitHub, version history and error logs. Collapsed by default.

IN YOUR OWN COPY

Back-office access, data and alerts

The demo’s Customer/Business switch exists only in the showcase. In your copy the back office is private and opens with a staff sign-in.

How to get in

1. Publish the app (the copy arrives as a draft)
2. Open the app, tap the staff/team sign-in link at the bottom and create an account
3. DevAny → Manage → **Users**: give yourself **Admin** and employees **Staff**
4. Sign in again in the app; the back office opens
5. The app labels these roles “Owner” (Admin) and “Team” (Staff)

There is no PIN and no automatic owner access.

Data and alerts

Customer records are stored in DevAny and shown in the back office and under Data. Lists closed to visitors: `feedback`

Every new record in these lists creates a dashboard alert and, while the app is live, a free email to you.

Email and AI

Emails to customers (confirmations, reminders) go out when the app’s email is on and the app is live; each uses a small amount of AI credit.

Allergen suggestions, feedback summary and stats tips. Runs for real when clicked and uses AI credit; in the demo the results are pre-made.

AFTER YOU COPY

Go-live checklist

The steps shown in the dashboard after copying. Price, text and image edits go live instantly and spend no credit.

1. Create your own staff account with Staff sign-in on the menu, then give it the Owner role in your dashboard (Users); give your team the Team role
2. Replace the dishes, prices and photos with your own (Menu & allergens → Items & prices)
3. Check every dish's allergens and diet tags with your kitchen, then mark it verified in the allergen matrix
4. Set your opening windows, happy hour and categories in Menu schedules, and your time zone and currency label in Settings
5. Clear the sample ratings and menu-open history from Overview or Settings when you're ready for real guests
6. Print a table tent for every table from Table QR codes after publishing

This app takes no online payments (customers pay at the venue and staff mark “Paid”), sends no real SMS (WhatsApp only opens a link) and does not sync with POS, hotel/clinic software, calendars or review sites.

FOR YOUR OWN BUSINESS

Copy this app to your account

“Copy to my account” on the showcase page brings the project into your account as a draft, with your business name, city and contact details.

How it works

1. Open `devany.ai/showcase/apps/smartmenu`
2. Enter your business name, city, phone, WhatsApp and email
3. The project is created as a draft; clear the sample records in one tap from the dashboard
4. Edit texts, prices and images for your business, then publish

Copying uses no AI and spends no credit.

Plan to publish

PLAN	LIVE PROJECTS	DOMAIN
Free	No publishing, preview	—
Builder · $29/mo	1	Included
Pro · $79/mo	3	Included
Studio · $199/mo	10	Included + white label

Copying is available on paid plans. Every paid plan includes monthly AI credit equal to its price.

Qahwa & Co. is a fictional business: phone and address are demo placeholders, images are illustrative, and submissions do not reach a real business.
