

Casa Velluto website

Visitor experience and owner dashboard

Bilingual (English + Arabic RTL) website for a fictional Roman trattoria and aperitivo bar on Jumeirah Beach Road: dashboard-editable signature dishes, bar list and events, reservation and private-dining forms, FAQ with structured data.

casa-velluto.devany.app

What was built?

Italian restaurant — Roman trattoria & aperitivo bar · Jumeirah, Dubai. A multi-page DevAny website, open to search engines and managed without code.

14

addresses · 2 languages

5

content lists edited in the dashboard

4

visitor forms · land in the dashboard

2

paired apps

For visitors

- Full English + Arabic page sets with true RTL layout and hreflang pairs
- Menu, bar list, events and FAQ editable from the dashboard, server-rendered for SEO
- Reservation, private-dining, contact and newsletter forms with owner alerts
- Animated heading reveal, wood-fired photography and a velvet bordeaux design system

For the owner

- Edit content lists without code
- An inbox for form requests
- Email alert on every new request
- SEO, domain, sharing, analytics

Under the hood

- Every page has its own address and title
- Sitemap and search-engine data
- Mobile-first, cookie-free analytics
- Languages: English, Arabic

Pages

Page titles are in the site's own language. Languages: English, Arabic.

PAGE	PATH
Roman Trattoria & Aperitivo Bar, Dubai	/
Menu — Fresh Pasta, Wood-Fired Pizza & Dolci	/menu
Our Story — A Roman Kitchen in Jumeirah	/our-story
Aperitivo & Bar — Spritz, Negroni, Zero-Proof	/aperitivo-bar
Private Dining & Events in Dubai	/private-dining
Book a Table — Reservations	/reservations
Contact, Hours & FAQ	/contact

The Arabic version covers all 7 pages with a true right-to-left (RTL) layout.

Forms: requests go straight to the dashboard

The site's forms write every submission into the owner's dashboard as a separate record. Visitors cannot see other people's requests.

FORMS ON THE SITE

Table reservation

Private dining & events enquiry

Contact message

Newsletter sign-up

Inboxes in the dashboard

`messages` `private_events` `reservations` `subscribers`

These lists are private: visitors can only add a record, never read existing ones.

1 The visitor fills in the form

Required fields, consent and spam protection; nothing is lost if sending fails.

2 A record lands in the dashboard

The request is written to the inbox under Data with its date and contact details.

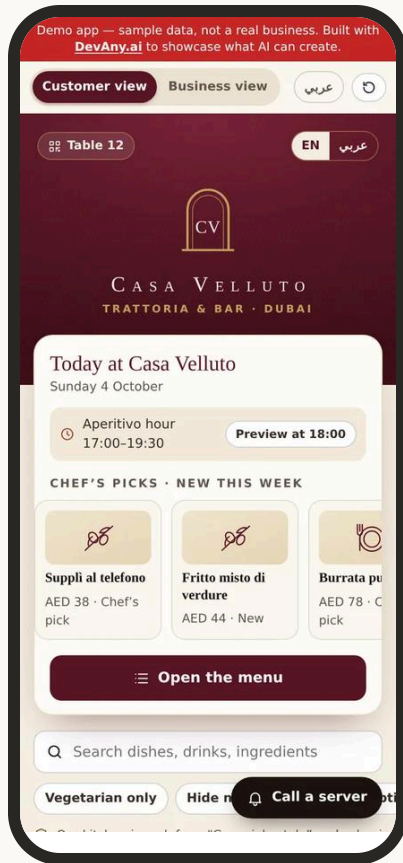

3 The owner is alerted

A dashboard alert and, while the site is live, an email summary.

A form stores a **request**: there is no automatic confirmation, availability check or email to the guest. The owner sees it in the dashboard and replies by their own phone or email.

The site and its paired apps

The site works together with DevAny apps built for the same brand.

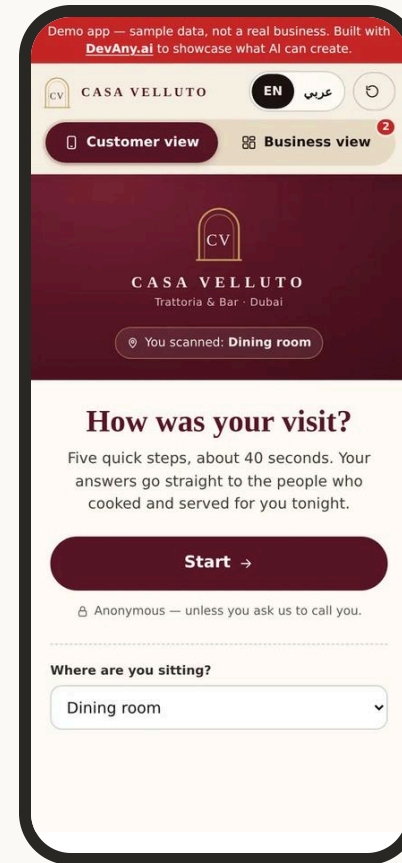

App Digital Menu

A QR digital menu for a Roman trattoria and aperitivo bar in English and Arabic, with diet filters, pairings, an aperitivo-hour banner and call-a-server, plus a bilingual menu editor, table QR tents and menu stats for the team.

- Overview: 14-day menu views (EN/AR), most-viewed dishes and top filters
- Live table requests: On my way → Done, reflected to the guest
- Menu editor: EN/AR side by side, add/edit/delete, reorder items and categories

demo-casavelluto-menu.devany.app

App Guest Survey

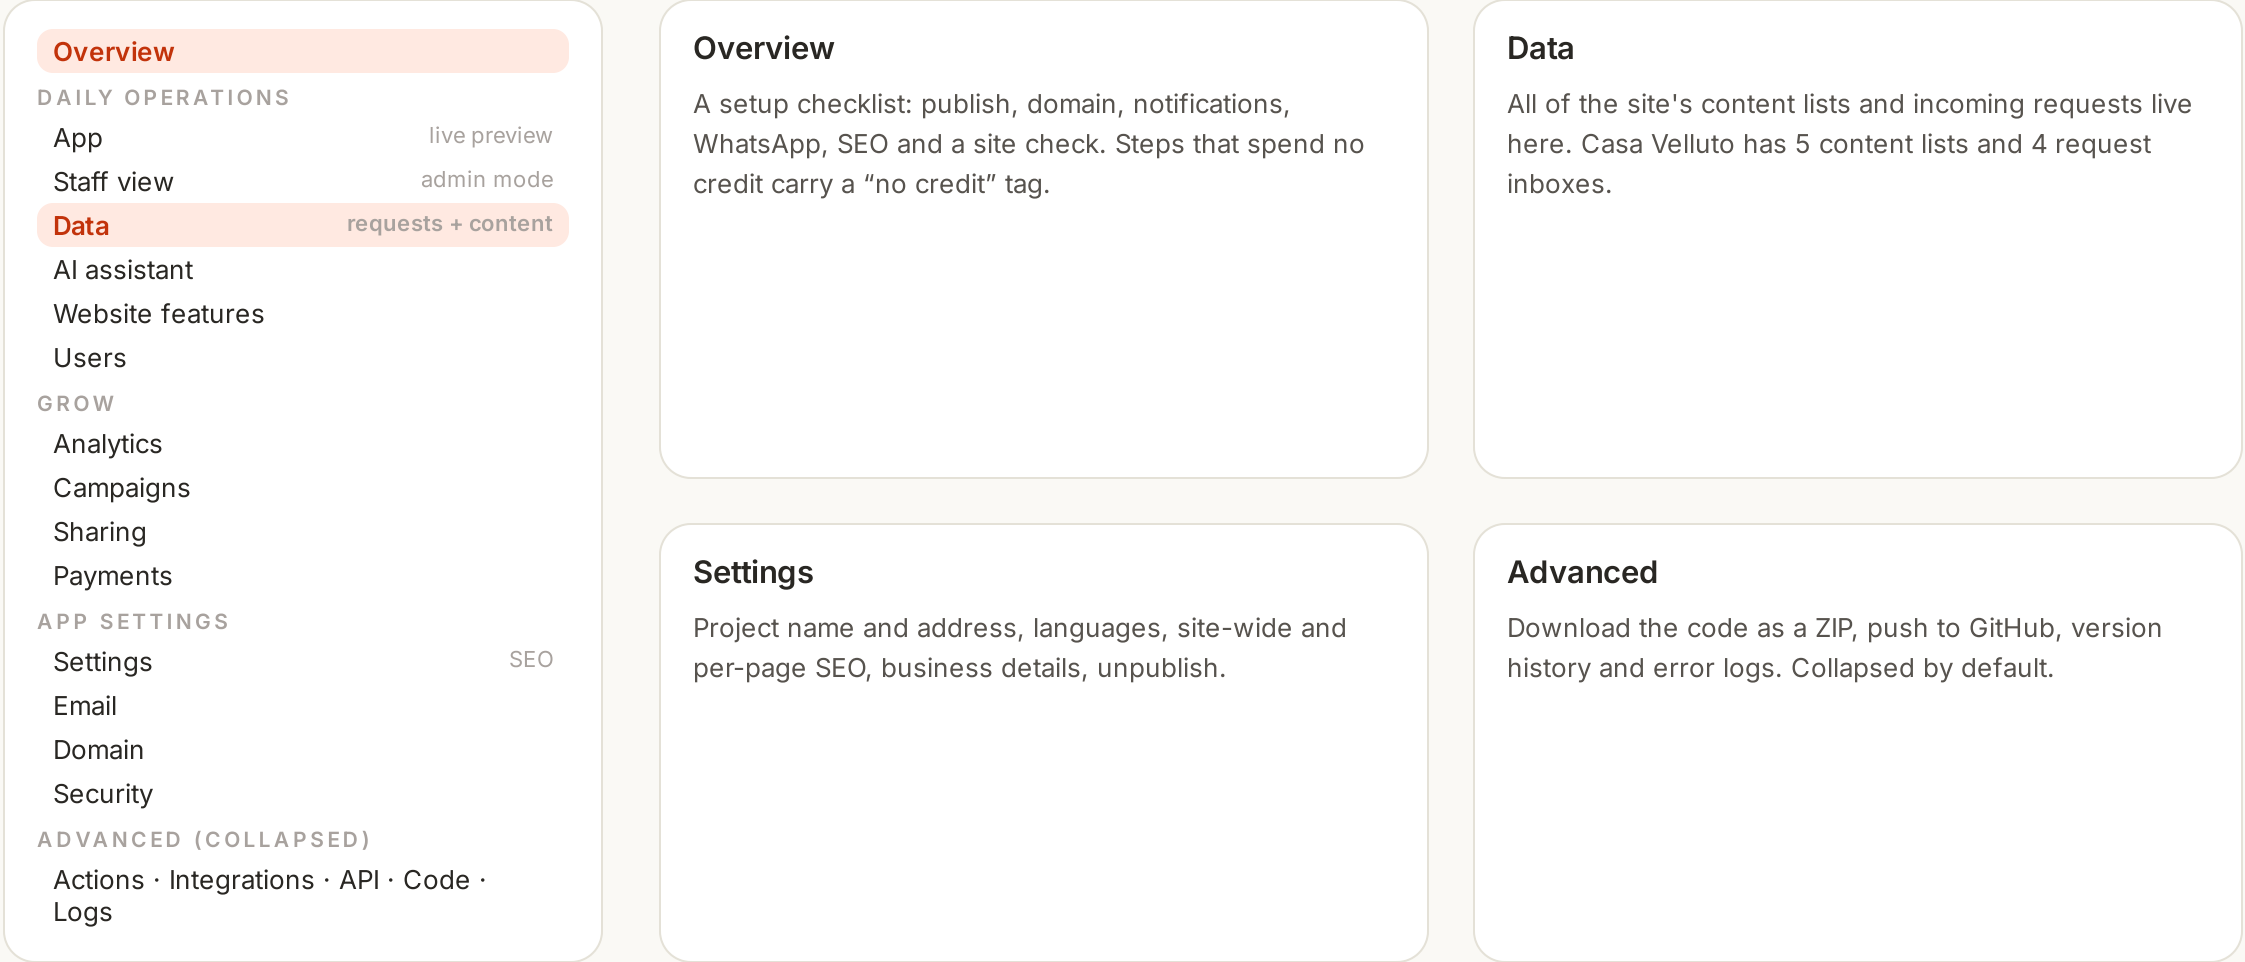

A 40-second QR guest survey for a Roman trattoria in Dubai, in English and Arabic. Guests rate food, service, ambience and value, and the manager sees NPS, trends and every low score the moment it happens.

- Today / 7-day / 30-day average rating and NPS with promoters, passives and detractors
- Weekly trend chart and scores by category, visit type, location and weekday
- Instant low-score alert banner and badge

demo-casavelluto-survey.devany.app

Map of the DevAny dashboard

The owner runs the project from the “Manage” screen on devany.ai. The menu runs from daily work to technical settings.

Incoming requests

Every form submission becomes a record in the dashboard and the owner is notified.

1 Dashboard inbox

The request lists under **Data** are the inbox:
messages private_events reservations subscribers.

2 Dashboard alert

A dashboard notification appears as soon as a request arrives (up to 20 per app per hour).

3 Email

While the site is live the account owner gets an email summary of each request. Add up to 5 more recipients under **Email → Notification recipients**. Free.

Privacy

Every list has a "visitor privacy" switch in the dashboard. Request lists are locked.

Replying

There is no "reply" button in the dashboard. The owner replies using the phone or email the visitor left.

What do you change, and where?

Day-to-day content edits spend no credit and go live immediately. AI is only involved in design and structure changes.

CHANGE	WHERE	LIVE WHEN	CREDIT
Records in the content lists (text, price, order, show/hide, photo)	Data → the list	Immediately	None
Page text (headings, paragraphs, buttons, links)	Data → Content	Immediately	None
Images	Data → Images	Immediately	None
Per-page search title and description	Settings → Pages	Immediately	None
WhatsApp, newsletter, search settings	Website features	On the next visit	None
New section, new page, design, new language	Builder (AI)	Draft → Publish	AI credit

Multilingual records: each language has its own field. Make each change in every language.

Content lists edited in the dashboard

The site's repeating sections are lists. Add, edit, reorder or hide records and the page updates itself.

LIST	RECORDS
signatures	9
cocktails	5
zero_proof	5
events	4
faq	8

Images

All images in one list. Upload, pick from the royalty-free stock library or reuse an existing one.

Versions

Dashboard edits are saved as versions too. You can restore an earlier one.

Sample data

In a copied project the sample records clear in one tap; anything you added stays.

WEBSITE FEATURES

Switch on, off, configure

On the Website features screen every change saves itself and shows on the next visit, without rebuilding the site.

FEATURE	WHAT IT DOES	CASA VELLUTO	COST
WhatsApp button	Number, pre-filled message, side, devices and pages	On	Free
Newsletter	Sign-up block or top bar; sign-ups land in Data → subscribers	On	Free
Site search	Instant page and list search; optional AI answers	On	Search free · AI answers use credit
AI assistant	No-code chat assistant: name, welcome, tone, FAQs, lead capture	Off	Chats use AI credit
Booking module	Service, person and time on /book; confirmation email	Off	Free

The AI assistant and AI search answers spend the business's own AI credit; the other features are free.

SEO, domain, sharing and analytics

The site ships ready for search engines; visibility and address settings are managed in the dashboard.

SEO

- Each of the 14 addresses has its own title and description
- Sitemap at /sitemap.xml
- Per-page title/description in Settings → Pages, no rebuild
- SEO check; Auto-Fix rewrites title and description with AI

Domain

- Connect your own domain with two DNS records and verify; HTTPS is automatic
- casa-velluto.devany.app keeps working
- If the project address changes, the old one redirects

Sharing

- Copy link
- Downloadable QR code
- Social preview card

Analytics

- Total, last-30-day and per-page views
- No cookies, no visitor tracking
- Going over fair use never takes the site down or adds a charge

Common tasks

All done in the dashboard, with no credit and no rebuild.

Update a record

1. Manage → Data → **signatures**
2. Open the record, change the field
3. Save; the page updates immediately

Add a new record

1. Data → **cocktails** → Add record
2. Fill in the fields, add a photo
3. Save; it appears on the site

Hide a question from the FAQ

1. Data → **faq**
2. Open the record and switch visibility off, or delete it
3. Deleting cannot be undone; hiding is safer

Send alerts to your team

1. Email → Notification recipients
2. Add up to 5 addresses
3. Every new request reaches them too

Replace the hero image

1. Data → Images
2. Pick the image, Replace
3. Upload or choose from stock

Get a QR code

1. Sharing → Download QR
2. Print it for windows, tables or flyers

Copy this website to your account

"Copy to my account" on the showcase page brings the project into your account as a draft, with your business name, city and contact details.

How it works

1. Open [devany.ai/showcase/casa-velluto](#)
2. Enter your business name, city, phone, WhatsApp and email
3. The project is created as a draft; clear the sample records in one tap from the dashboard
4. Edit texts, prices and images for your business, then publish

Copying uses no AI and spends no credit.

Plan to publish

PLAN	LIVE PROJECTS	DOMAIN
Free	No publishing, preview	—
Builder · \$29/mo	1	Included
Pro · \$79/mo	3	Included
Studio · \$199/mo	10	Included + white label

Copying is available on paid plans. Every paid plan includes monthly AI credit equal to its price.

Casa Velluto is a fictional business: phone and address are demo placeholders, images are illustrative, and submissions do not reach a real business.
